Preserve the text. Separate the views.

Text and measurement views have distinct roles. Measurements never overwrite training text.

1 Keep the original

`original_text · c02`

`"    return x + 1\n"`

Four indentation spaces remain.

TEXT TRANSFORMS

- Remove one leading U+FEFF
- Normalize CRLF / CR to LF
- Apply NFC normalization

2 Training text

`text`

`"    return x + 1\n"`

Indentation and final newline are retained.

COPY

Measurement views

strip text → length

strip lines → repetition

No write-back to text

Rules determine the outcome

One primary status + all applicable diagnostics

NO HIT

PRIMARY REASON

kept.jsonl

Original + training text + rule version

rejected.jsonl

Original record + reason + diagnostics

FULL FIXTURE • HAND-DERIVED EXPECTATION

13 = 5 + 8

Disjoint record outcomes

10 DIAGNOSTIC HITS

Overlapping hits ≠ rejected records
